

Security Shutters

High Security Group supply a range of galvanised or extruded aluminium shutters to suit all requirements, offering both visibility and security.

Options include either manual operation or electric motors with remote control options. We have a range to suit every requirement and pocket, and our expert staff are always at hand to advise the best solution for you.

Galvanised Shutters and Grilles

Our range of galvanised shutters and grilles are an effective and cost efficient way to secure your home and premises, and have the following features and benefits:

- >> Motorised or manually operated
- >> All manufactured using 75mm galvanised steel, and perforated to allow visibility
- >> Two way integral locking device
- >> Spans widths up to 10,000mm
- >> All steelwork is polyester powder coated to a range of BS or RAL stocks.

Extruded Aluminium Shutters

Our range of extruded aluminium shutters are an attractive alternative to a traditional galvanised steel roller shutter, offering a level of security required to secure almost any aperture without comprising on space or appearance.

- >> A strong double walled aluminium profile
- >> For higher security domestic, medium security office / commercial use
- >> Spans widths up to 5000mm
- >> Very compact - ideal for reveal fixing
- >> Option for high security guide / runners
- >> Can be finished in almost any colour (subject to quotation)
